

Dear colleagues,

We would like to invite you to submit a research articles or review-chapters for the upcoming publication "Water Resources Management: Methods, Applications and Challenges" which will be published by Nova Science Publishers, Inc.

Water resources are considered as one of the vital components of the environment, as well as a basic prerequisite for all human economic and social activities in general. Due to the fact that drinking water could become a scarce resource in the future in most countries, the evaluation of water quantity, as well as water quality has become a significant issue recently. The appearance of global water problems (whether there will be enough water for all and whether its quality is satisfactory) have a major impact on the question of water resources management and sustainable development and the issue of the trade-off between economic growth and water resources.

We invite authors, scientists, and professionals involved in the theoretical, methodological and practical studies of water resources management to contribute research articles or review-chapters that will illustrate the continuing effort to understand developments of new techniques, methods, and tools for integrated water resources management. All issues related to water preservation and protection, regulated use, regenerated supply and solving a variety of problems in integrated water resources management are welcome to this monograph. This publication will be devoted to a variety of water resources issues and will be useful to experts, professionals, researchers, scientists, and practitioners in the field of water resources management.

Potential topics include, but are not limited to:

- Water resources management
- Water quality assessment and protection
- Hydrological modeling
- Flood and Flood Protection
- Groundwater resources quality assessment and management
- Wastewater assessment and management
- Climate-water relationship and management
- Soil-water relationship and management

The timeline:

Deadline for abstract submissions: December 10, 2019

Deadline for chapter submissions: February 10, 2020

Revision due: March 10, 2020

Editors:

d.jakovljevic@gi.sanu.ac.rs

Please send the abstract and the chapter to Ana Milanović Pešić (a.milanovic@gi.sanu.ac.rs) or to Dejana Jakovljević (d.jakovljevic@gi.sanu.ac.rs).

Inclusion in Nova's edited collections is without charge to authors. The only exceptions are color figures if required and an English editing fee if it is determined to be necessary. More information related writing instructions will be sent to the interested contributors.

We look forward to the possibility of working together.

Sincerely,

Ana Milanović Pešić

Dejana Jakovljević
